DECEMBER 16TH, 2018 BARCELONA-SPAIN

SCIENTIFIC PROGRAM - DECEMBER 16th

PERCUTANEOUS AND M.I.S. LAB

GRECMIP

GRECMIP wants to announce the Advanced Ankle Arthroscopy Course that will be held in Barcelona, on next December 16th, 2018.

GRECMIP has great experience in hands-on courses, and a lot of surgeons started foot and ankle minimally invasive techniques after participating in one of their courses.

The aim of this course is to introduce the attendee to the most advanced ankle arthroscopy techniques.

As ankle arthroscopic indications evolved in the last years, case discussion sessions are mandatory to understand ankle pathology.

The course is opened to experienced surgeons in ankle arthroscopy, who want to introduce in the most advanced techniques of ankle arthroscopy or want to enlarge their knowledge in these techniques though they are very experienced ankle arthroscopists.

The course has a menu of techniques, and each attendant should choose 4 foot and ankle arthroscopic techniques within a menu of arthroscopic techniques listed below:

- anterior ankle arthroscopy
- hindfoot endoscopy
- tendoscopy

For a better understanding of the techniques, an experienced anatomist will do live dissections during the course.

SCIENTIFIC PROGRAM - DECEMBER 16th

PERCUTANEOUS AND M.I.S. LAB
